

GoFileDrop is Secure...

Join the thousands of users who trust GoFileDrop to securely collaborate with co-workers, customers and partners.

In using the service you "authorize" GoFileDrop to deposit files in your Google Drive account using a technology known as OAuth, this is the leading technology in the field of authorizing third party Applications to enable working with services such as Google Drive and is proven to be secure.

When someone sends files to your Google Drive account using GoFileDrop those files are sent in an encrypted format and automatically deposited in your Google Drive account.

We are committed to maintaining your security and keeping your trust.

All data is backed up automatically and utilises robust data replication and redundancy.

LOGGING IN IS SECURE

All logins are protected using SSL encryption - the same security used to login to online bank accounts.

SECURE PAYMENTS AND BILLING

GoFileDrop uses secure third party services to process your subscription payments, these third parties currently include Stripe, PayPal and in the case of Enterprise licensing Wire Transfers and company cheques cleared through our Corporate Banking services provided by Lloyds Bank.
